Errata to "An Introduction to the Physics of Particle Accelerators", 2nd Ed.

Mario Conte and William W. MacKay

Chapter 3

1. p. 61: Eq. (3.133) should read:

$$b = -\frac{2^{1/3}}{1-2^{1/3}}.$$

2. p. 61, second line from bottom: First condition of bilinearity should read:

$$[ax+by,z] = a[x,z]+b[y,z].$$

3. p. 65, line after Eq. (3.143) should read: which is not quite antisymmetric...
4. Problem 3-9, line after equation should start: Note that this gives ....

Chapter 4

5. p. 87, Eq. (4.57) should be

$$\vec{B}(s) = B_0\hat{s}\frac{\sqrt{l^2+4a^2}}{2l}\left[\frac{s}{\sqrt{s^2+a^2}}+\frac{l-s}{\sqrt{(s-l)^2+a^2}}\right].$$

6. p. 88, The last line of Eq. (4.59) should read:

$$= -B_0\frac{\sqrt{l^2+4a^2}}{2l}\left(\frac{a^2}{(s^2+a^2)^{3/2}}-\frac{a^2}{[(s-l)^2+a^2]^{3/2}}\right)r$$

7. p. 92: Problems 4-9 and 4-10 are essentially identical. I'm not sure how that happened. Delete 4-10.

Chapter 5

8. p. 97, 3rd line after Eq. (5.3): Change "eigenvaluesof" to "eigenvalues of".
9. p. 99, 6th line from bottom: Change "this of solution" to "this solution".

Chapter 6

10. p. 129, 4 lines before Eq. (6.89): The second sentence of the paragraph is wrong. There are some cases of stable matrices with equal tunes and some coupling elements. One example is

$$\mathbf{M} = \begin{pmatrix} \cos\mu & \sin\mu+\frac{a^2}{\sin\mu} & a & 0 \\ -\sin\mu & \cos\mu & 0 & -a \\ a & 0 & \cos\mu & \sin\mu+\frac{a^2}{\sin\mu} \\ 0 & -a & -\sin\mu & \cos\mu \end{pmatrix}.$$

Version: 4 Aug., 2008

Chapter 7

11. p. 162, Problem 7-3: Replace "γtr" with "$\gamma_{\rm tr}$".
12. p. 162, Problem 7-3: The atomic number of gold is $A = 197$ and not 179.

Chapter 8

13. p. 186, Problem 8-5: The last part should be labelled "c" not "b".

Appendix A

14. Reference 5 should be replaced by

    E. D. Courant, "Computer Studies of Phase-Lock Acceleration", 1961 Int. Conf. on H. E. Accelerators, Ed. M. H. Blewett, Brookhaven National Lab, p. 201 (1961).

    H. Koziol, "Beam Diagnostics for Accelerators", CERN 94-01, v. II, p.565-599 (1994). See page 599.

Appendix D

15. p. 346, Eq. (D.13): Replace N_z with N.
